

technical specification

Wheeled based version has locators for the 600 x 400 mm Maxi-Nest trays on top.

- Wheeled or pallet based
- Smooth hygienic surfaces
- Perforated sides maximise air flow
- Erect and fold down from one position
- Label holders on internal and external walls
- Locking catches accessible inside and out
- Non-sequential folding

Maxi-Pac	BD702809 Wheeled Base	BD702609 Pallet Base	BD702709 Pallet Base
External Top Dimensions	800 x 600 x 1080 mm	800 x 600 x 750 mm	800 x 600 x 1000 mm
Internal Base Dimensions	756 x 556 x 843 mm (below rim)	756 x 556 x 549 mm	756 x 556 x 846 mm
Folded Height	445 mm 41% of overall height	333 mm 33% of overall height	333 mm 33% of overall height
Capacity	357 litres	230 litres	357 litres
Load	250 kg	150 kg	250 kg
Weight	25.5 kg	17 kg	22 kg
Material	PP base, HDPE walls	PP base, HDPE walls	PP base, HDPE walls
Label Holders No. & Size	A4 (end panel only)		A4 (all sides) inside and outside
End Drop Doors No. & Size	2 x 375 x 500 mm		2 x 375 x 423 mm
Side Drop Doors No. & Size	2 x 660 x 375 mm		2 x 712 x 370 mm
Stacking	5 folded, 2 static, 1 dynamic		7 folded, 3 static, 2 dynamic
Loading - standard 12m trailer	64 erected, 320 folded		64 erected, 448 folded

External & internal label holders

All plastic locking catches

4 x 4" castors (2 swivel, 2 fixed)

4 way entry pallet base

Maxi-Pac smoothes retail handling

Maxi-Pac is a major boost to stock replenishment efficiency. By allowing produce to travel direct from suppliers to the retail sales floor, Maxi-Pac embraces the simplicity of one-touch replenishment.

efficient stock replenishment

Sustaining stock availability during busy seasonal peaks is a perennial problem for retailers. Maxi-Pac builds on the range of purpose-designed LINPAC products, which expedite delivery and help retailers achieve levels of stock replenishment efficiency never before thought possible.

one-touch replenishment

Maxi-Pac allows stock to be moved from the warehouse to store in a matter of minutes. It is true one-touch replenishment at its best.

A simple example of the efficiencies it delivers is demonstrated by the bulk sale of potatoes in ASDA. Using their previous system, it could take anytime between 45 minutes and an hour to decant bags of potatoes from supplier packaging into display units in the store. Now, as Maxi-Pac becomes empty, a replacement unit, neatly packed by the potato supplier is wheeled out from the warehouse and the old one is folded down, ready to be returned for restocking by the supplier.

retail packaging innovations

LINPAC's unique understanding of the retail environment and radical approach to product innovation means that it can continue to develop packaging solutions that oil the wheels of the retail supply chain.

Established products like Maxi-Nest and Maxi-Fold containers, along with exciting new additions such as Maxi-Pac are offering huge handling improvements and driving efficiencies over the last 50 years, giving retailers vital commercial advantage.

ease of handling

greater vehicle fill

Additional benefits come in the form of greater vehicle fill. The Maxi-Pac unit folds down when empty, to realise gains in transport efficiencies on return journeys. A standard 12-metre trailer will load 448 wheeled based units when folded down, compared to 64 when fully erected.

Health & Safety benefits

There are no recesses in which water can be trapped during the washing process. This is vitally important for suppliers as transit equipment with water traps can result in Health & Safety risks, as well as potentially compromising hygiene.

automated handling

Handling is improved by ergonomic features, such as non-sequential folding and high performance catches. Maxi-Pac can be used within automated packing systems offering further potential for time and cost savings and has been designed with smooth walls for safe use in the retail environment.

Available with either a pallet base or a wheeled base, Maxi-Pac offers flexibility to your logistical needs should conveyors or forklift trucks play an integral part in the handling and distribution chain of the business.
